INSTALLATION OF HOT FIX 001

This installation guide describes how to update Microsoft Dynamics C5 2012 with Hot fix 001.

The Hot fix is released as zip-files without installation program. The update is done by unpacking the zip files and copying the files to the C5 folders and overwriting existing files.

CONTENTS OF THE HOT FIX 001

The feature pack is shipped as 2 sets of files – one for each database type:

- C5_2012HF001_Native.zip for Native database
- C5_2012HF001_SQL.zip for SQL database

For both C5_2012HF001_Native.zip and C5_2012HF001_Sql.zip, following files are present::

Country/DK/OIOUBL.Mapping.c5m
/IS/default.html

C5NativeKernel:

The Native Kernel folder will include:

C5W32.exe, C5W32C.exe

C5SQLKernel:

The SQL Kernel folder will include:

D5W32.exe, D5W32C.exe

BEFORE STARTING THE INSTALLATION

To ensure an easy and secure installation following steps have to be done

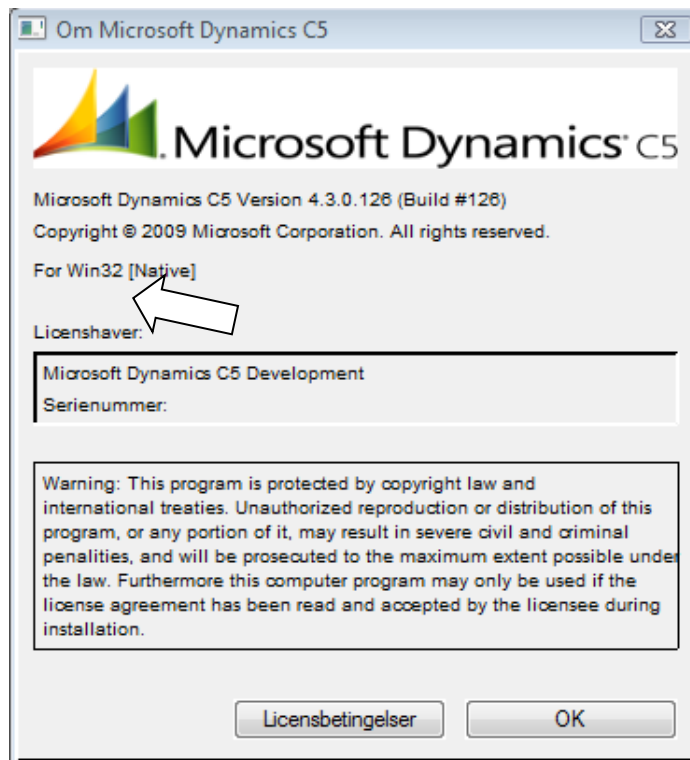

TAKE FULL BACK UP OF THE INSTALLATION!

It is important to take a back up of the entire existing Microsoft Dynamics C5 installation before the update is started. The update requires that existing files are overwritten; it will not be possible to restore the original files after the update.

INVESTIGATE IF THERE IS USED NATIVE OR SQL INSTALLATION.

If it is uncertain whether the original installation was Microsoft Dynamics C5 2012 Native or SQL and thereby which zip file that should be unpacked C5_2012HF001_Native.zip or C5_2012HF001_SQL.zip to perform the upgrade, this can be checked like follows:

1. Start current Microsoft® Dynamics C5 2012.
2. Click menu bar on top and select "Help\About Microsoft® Dynamics C5" (In console version this can be found by pressing ALT+A)
Just above the field "License holder/Licenshaver" it is written whether the current installation is a Native or SQL installation.

In the example above, a Native kernel is used.

If Native kernel is used the following should be used:
C5_2012HF001_Native.zip

If SQL kernel is used the following should be used:
C5_2012HF001_SQL.zip

INSTALLATION OF HOT FIX 001

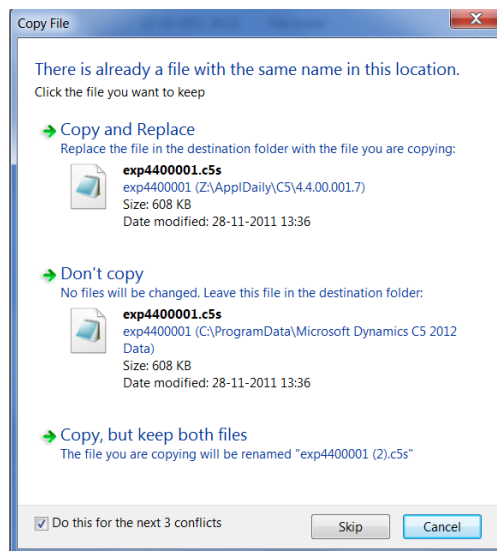

Copy the file C5_2012HF001_Native.zip/C5_2012HF001_SQL.zip to a temporary folder and unpack the files. Unpack the files with YES to use folder names.

The description below shows where the installation has to be made if the default folder structure was chosen during the installation of Microsoft Dynamics C5. If the installation folder was changed during the installation, you have to find this folder.

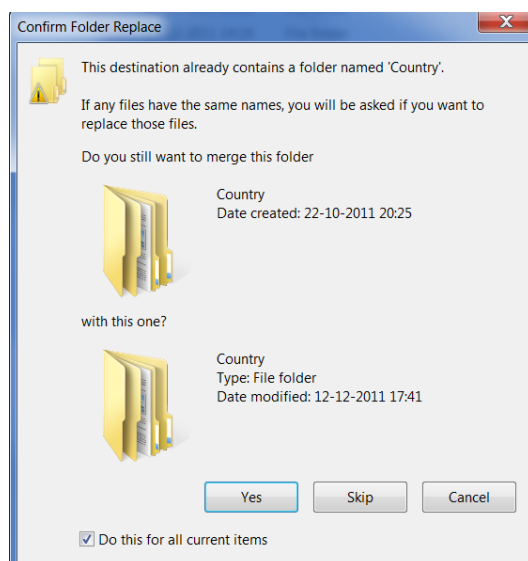

The starting point for the description below is an English version of Windows® Windows7™, hence folder structure and naming.

1. Copy/overwrite the contents of the unzipped folder named "C5NativeData" or "C5SQLData" (depending on what you use) to :
C:\ProgramData\Microsoft Dynamics C5 2012 Data

A warning will appear telling you that there already is a file with the same name in this location.

2. Mark the field "Do this for the next xx conflicts" and press **Copy and Replace**
A warning will appear telling you that this destination already contains a folder with the same name.

3. Mark the field "Do this for all current items" and Click **Yes**
4. In case the label files C5sysald.dk, C5sysald.is and C5sysald.uk are copied, index files to label files have to be deleted manually – it concerns:
C5txtidx.dk, C5sysali.dk, C5sysalc.dk, C5modalt.dk (Danish label files)
C5txtidx.uk, C5sysali.uk, C5sysalc.uk, C5modalt.uk (English label files)
C5txtidx.is, C5sysali.is, C5sysalc.is, C5modalt.is (Icelandic label files)
This will ensure a correct use of the label files. The deleted files will be re-created automatically during the first start up of Microsoft Dynamics C5 2012.

INSTALLATION OF KERNELS

1. Copy/overwrite the contents of the unzipped folder named "C5NativeKernel" or "C5SQLKernel" (depending on what you use) to :

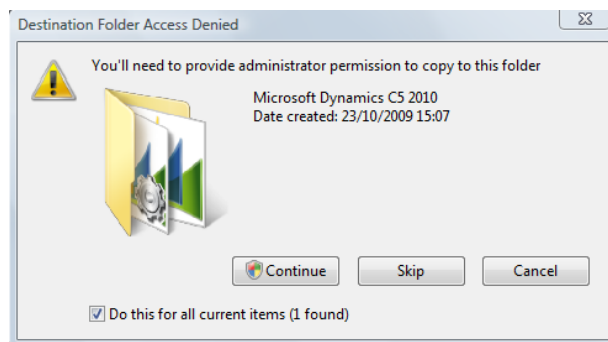

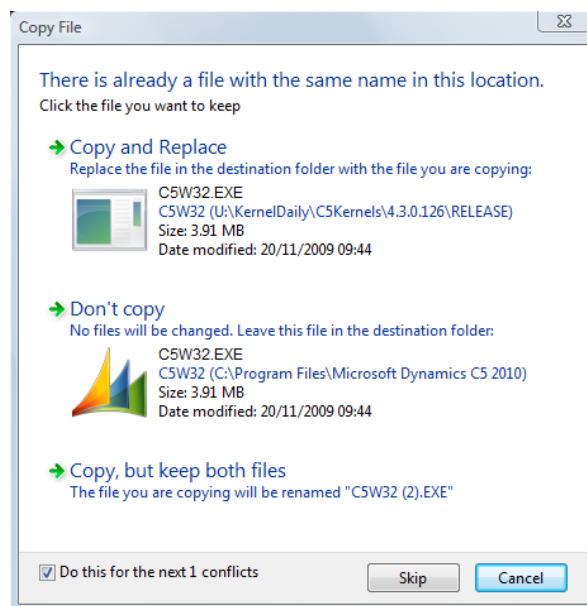

C:\Program files\Microsoft Dynamics C5 2012

For **SQL** the files are named D5W32C.EXE and D5W32.EXE

For **Native** the files are named C5W32C.EXE and C5W32.EXE

2. A warning will appear for both the console version and the GUI version telling that you are about to overwrite existing files. Click "**Copy and Replace**" for both warnings.

Below is installation of Native shown.

3. Click "Continue" and the files will be copied to the folder.

You can now delete the temporary folder where you unzipped the files and you are ready to go to the section "Start Microsoft Dynamics C5 2012".

START MICROSOFT DYNAMICS C5 2012

Go to Start\Programs\Microsoft Dynamics C5

A dialog appears asking for permission to update to version 4.4.00.001 – enter "Yes"

If you have not started as "Supervisor" you will get the opportunity to change:

Enter "Yes"

Change to "Administrator"

Click OK

Then a new dialog appears **Begin Automerger to Microsoft Dynamics C5** – it is asking to make changes because there are changes to the **data dictionary** due to new fields in CustJournalLine and VendJournalLine.

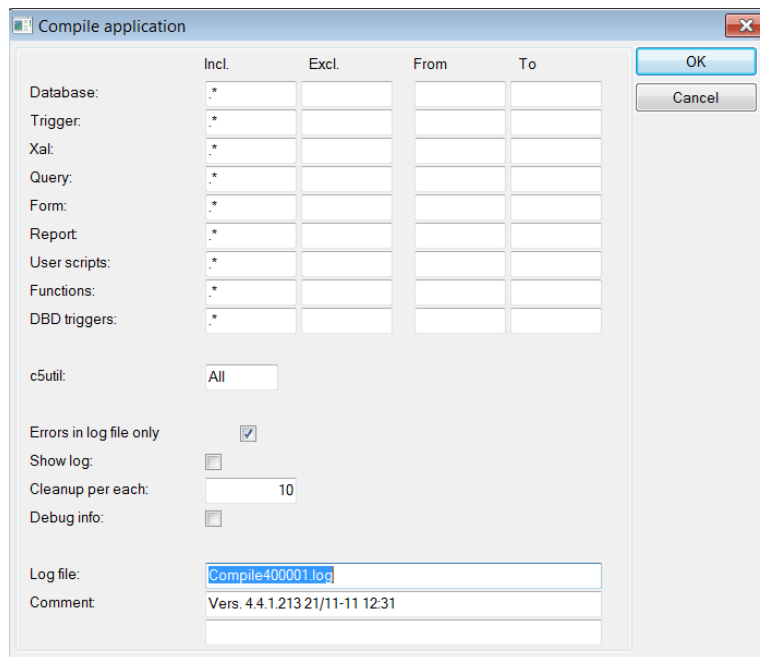

Enter "YES" (Enter)

New dialog is asking:

Update Data Dictionary automatically to Microsoft Dynamics C5 version 4.4.00.001

Enter "YES" (Enter)

Afterwards Microsoft Dynamics C5 2012 automatically will recommend a compilation of the application.

If the column "Incl." is not filled out, you have to mark it manually as shown in the picture above.

Press "**F3**" to start the compilation.

As soon as the compilation has finished you will be asked if you want to update the company to version 4.4.00.001

Just enter "**Yes**" and you are running Microsoft Dynamics C5 version 4.4.00.001.

If you are using several companies, you will have to update each company separately. By changing the company (General/Daily/Change data set (company)) you will be asked to update the data set to version 4.4.00.001.

To ensure that the correct Hot fix is installed go to – General, Table, System status, Customization configuration and verify following:

Application version: 4.4.00.001

Build 4.4.00.001.12

Kernel version: 4.4.0.191

IMPORTING NEW OIOUBL MAPPING

The new mapping can be imported from:

General, Table, XML, XML Schema - Menu item – Import mapping

You then have to navigate to the file OIOUBL.Mapping.c5m.

The file is default placed in the folder:

C:\ProgramData\Microsoft Dynamics C5 2012 Data\Country\DK\OIOUBL.Mapping.c5m

Choose “All” or import the schemas one by one.

If there schemas exists in the file that already are imported, a warning will appear asking if you want to overwrite the existing file. If there are not made any modifications to the released mapping – say **yes** to overwriting to all the schemas.

The setup for the Presentation style sheet or Schematron file will **not** be overwritten.

DBD AUTOMERGE

OBS - When you update C5 versions where payroll tables are set to “Only in DAT file” the tables are set to “In each datafile” after the DBDautomerger has run.

Microsoft Dynamics is a line of integrated, adaptable business management solutions that enables you and your people to make business decisions with greater confidence. Microsoft Dynamics works like and with familiar Microsoft software, automating and streamlining financial, customer relationship and supply chain processes in a way that helps you drive business success.
